"Providing Diagnostics for the Developing World"
Apr-Jun 2025 Newsletter

Let's take a walk down memory lane and around the globe...

Haiti in 2011

"Hi Alynne,
Just wanted to thank you and your organization for the availability of ordering test strips. They were very simple to use. We were able to diagnose cases of malaria in many children where the diagnostics were very important. We had a couple of 6- to 9-month babies with malaria also. One also had pneumonia so diagnosing the malaria really changed the medications given.
Thanks again for helping with correct diagnosis.
Cyndy, Friends of the Children"

Mali in 2012

"Thank you Alynne,
Not sure why I should get these for free- but I am very thankful and will graciously accept your gift. I will pass on that blessing to others who will need those tests to diagnose their malaria.

I am attaching photos of **3 children- all with severe falciparum malaria** (all that I have seen in the last year) - one with cerebral malaria (the little girl unconscious on the stretcher) - **all children had a complicated clinical course- but in the end, all recovered without neurologic deficit.** My present back to you!
Blessings, Ted"

Burkina Faso in 2012

"Dear Alynne,
Thank you for your gift. You are such a blessing to the ministry.
We receive the donation with joy and we ask the Lord to bless you and your ministry 100 folds for your kindness and partnership in ministry.
Thank you!
Madeleine Medical Mission International"

Uganda in 2012

Mozambique in 2012

"Dear Alynne,
I would like to thank you so much for all your help and amazing service in helping us getting these rapid tests. **We work as a team in a quite remote part of Mozambique** and having these can seriously **make the difference between life and death** for a patient so thank you so very much for your help!!

Thank for all your help and your amazing service to us and others like us, working in remote areas and relying on people and organizations like yourselves to enable us to provide medical care to people in desperate need. Your work is greatly appreciated.

Blessings,
Annelie, Iris Ministries"

Guatemala in 2012

"Hi Alynne,
Thank you so much for your kind words. We **value the partnership** we have with your organization and understand we need to lift each other up!

Thank you again for all you do for so many people.

Blessings,
Heather, Faith in Practice"

Africa in 2011

"Alynne,

Thank you so much for all the supplies for Africa. Everything worked out fine and the test kits for malaria were well packed and insulated for the plane trip. We were able to test many villagers and taught and trained an RN within our partnership Church community so they could continue testing the remote villagers after we left [we left some kits with them].

This was such a success because of Science with a Mission. Many of the children were positive and we never would have known. Many thanks for your mission-it is helping so many individuals! We will be in touch soon as we plan for more trips.

His blessings!

Sincerely,

Mary, Nurses for the Nations"

Well I hope you've enjoyed this little "blast from the past". I sure have. Hmmm, perhaps I'll do this again.

Be peace makers!

Alynne
