

Science with a Mission, Inc.
"Providing Diagnostics for the Developing World"
Oct/Nov/Dec 2016 Newsletter

Indonesia:

Susan and Michael serve with Wycliffe Bible Translators. Last month, Susan wrote and requested more malaria tests:

"We are based in Indonesia and have ordered in the past a few times. We have four children, ages 6 and under and it is SO helpful when we have a sick child to take the test at home and not have to take the whole family out after dark to a pharmacy, and wait in the heat with sick kids. **Thanks for a super product.**"

Haiti:

As I write this update, much of my time is taken with preparing orders for use in Haiti. Some groups are heading down specifically to help with recovery efforts after Hurricane Matthew. Others had planned their trips to Haiti long before the hurricane was forecast.

"Hi Alynne: thank you for your shipment! It arrived today, as you promised, so we are very happy to have this sophisticated material with us when we leave on Sunday. Our contacts in Haiti paint a very grim picture for us when we arrive. So we are very happy

that we will have an opportunity to work there with what you have supplied us. Thanks again.
Joe"

People carrying belongings through the streets of Port-au-Prince

"Thank you Alynne!

I meant to contact you before we left for Haiti, but **Matthew had thrown us for a loop.** We arrived on Monday evening, to find our area of concern, as well as most of the country suffering the consequences of a 2 year drought plus Matthew, i.e., the onset of chronic starvation for the foreseeable future. We have anticipated this, so we have had our community health program busy at work!

At any rate, **thank you again for your support.** You can check our website at www.haitifoundationofhope.org if you wish.
Joe"

We Care Haiti is one of the groups with which we partner. They work to rebuild and uplift the communities of Haiti suffering from both systemic poverty and the fallout of natural disasters. Turn this page over to see their four main focus areas:

Construction: They are rebuilding thousands of homes, schools, churches, orphanages, and businesses that were decimated by Haiti's 2010 earthquake.

Feeding: They are working to ensure that Haitians, and especially the children of Haiti, receive the nutrition they need to survive, recover, and thrive.

Children: Since children are especially vulnerable to starvation, poverty, abuse, neglect, and even human trafficking. We Care Haiti partners with and supports several Haitian schools and orphanages.

Kids from one of the orphanages

Medical: Basic medical care is unavailable to most Haitians. We Care Haiti strives to improve health by subsidizing emergency treatment and holding regular medical clinics. This is where Science with a Mission test kits come in.

{Sorry, I could not figure out how to rotate this photo.} Rachel is the Medical Coordinator for We Care Haiti Ministries

She sent this photo of children that come to the clinic from the orphanage in the neighborhood. **"They are the sweetest children and I love them to pieces and [I'm] glad they can come here for healthcare."**

Uganda:

Hope and Mercy Mission works in Uganda caring for the young...

and the old...

Do you see all the faces in the newsletter this quarter? These are just a few of the people you are impacting by partnering with SMI. Thank you!
