Oct/Nov/Dec 2019 Newsletter

TIME TO CELEBRATE:

100,000th test went to Haiti to the Christianville Clinic

200,000th test went to India with Nurses for the Nations

300,000th test went to Nicaragua with Global Health Outreach (Christian Medical and Dental Ministry)

And now...drum roll, please...the **400,000th** test has been carried to Niger with Effective Ministries and Link Niger.

Amy wrote: "I just got home from Niger last night. I was there for both a cataract mission and general medical team. Both were excellent missions. The cataract team did 113 surgeries and the medical team did over 150 tests involving blood and needles. We were so thankful to have only one "exposure". The tests with the post exposure kit are still in Niger. We will use them again in February when we are there with the women's maternity mission. The **test was super easy to use** and had a **quick result**. I was happy for that. Hope you are doing well!
Thanks for touching base and **thank you a million times over for the gift of the HIV tests!!**
They are a huge blessing!!"

Niger

Let's stay in Niger and "hear" from Dani. "Niger is a landlocked, desert land, where most people make a living farming or shepherding.

Jonathan, Dani, Isaiah, Anna, Grace, and Micaela. We are so thankful for the malaria tests that we are able to get from Science with a Mission. **Any time one of our kids spikes a fever, we immediately test for malaria.**

Our family is part of an indigenous ministry called Vie Abondante (French for "Abundant Life") here in Niger. The ministry focuses on evangelism, church-planting, discipleship Bible schools, leadership training, Christian primary schools, and well-drilling, just to

name a few. Jonathan is the director of the Bible School in the city where we live, and I homeschool our four children. On the side, whenever possible, I enjoy using my nursing skills to help care for the sick. This picture [bottom left] was taken in front of a stick church building with the members of the church.

Village ministry – we travel to churches in remote villages on Sunday mornings to visit and encourage the believers there.

You always have to be on alert to share the road with who-knows-what-or-who. Some of the most common sights are cows, camels, donkeys, goats, sheep, people, carts, and occasionally even a giraffe!"

In all circumstances

As we approach Thanksgiving...I hope you take some time to acknowledge and give thanks for the many blessings in your life. One that tops my list this year...clean water.

May we strive to do better to follow Paul's instructions to the early church in Thessalonica:

"Rejoice always, pray continually, give thanks in all circumstances; for this is God's will for you in Christ Jesus."

1 Thessalonians 5:16-18

Happy Thanksgiving Everyone!
