**"Providing Diagnostics for the Developing World"**  
**Jul-Sep 2022 Newsletter**

**South Sudan**

Last month, Mercy Beyond Borders ordered from us for the first time. While they work in several countries, the diagnostics they purchased were going to be used in South Sudan. This young country gained independence from Sudan in 2011, making it the most recent sovereign state or country with widespread recognition as of 2022. On their website, Mercy Beyond Borders explains why they choose to serve the people there:

**Why South Sudan?**

- World's worst country for girls' education (U.N.)
- World's most dangerous country for aid workers (Human Rights Watch, 2020)
- World's lowest literacy rates
- More than 90% of the population lives in extreme poverty
- Females still valued less than cattle

For these reasons and more...Science with a Mission was happy to help the medical ministry of this organization. We look forward to a long partnership.

**Cote d'Ivoire**

"Alynne,  
Thank you so much for your **mission** to the world **through science** and your generosity to Northwest Medical Teams! Blessings, Dan"

**Guatemala**

From Global Health Outreach:  
"You are a Blessing and we appreciate EVERYTHING you do!! All over the world!!  
Brenda"

**Haiti**

"Dear Dr. MacLean:  
Good morning!  
Thank you so much for helping our **medical mission trip** to be a **success!**  
Your supplies made a HUGE difference!  
Sincerely,  
Paul"

We continue to work with a wide range of ministries in Haiti. Below is a photo from a maternity center:

### **Volunteers**

This past quarter, we've had the joy of welcoming a number of new volunteers. It started with a few conscientious Boy Scouts working on a merit badge requiring community service. One boy, David, has continued to help us out even after he completed his badge...and even after he broke one of his arms. Yeah, THAT'S dedication!

**Trinity is almost ready to put the tops on the cassettes**

The next set of volunteers was a family: Mom (originally from Tanzania) and her three daughters. They were visiting my

next-door neighbors and celebrating a family birthday. But once they learned about Science with a Mission, they were excited to jump in and help with two orders needing some malaria diagnostics.

**Malise placing the strips into the cassettes**

**Brielle sealing the finished product**

This is what it's all about. Each person doing what they can...all for the glory of God! Until next time...be a blessing!
